## **DAILY ONLINE ACTIVITIES SUMMARY**

between 1 and 50 2. This is a Python Program to Check if a Number is a Palindrome 3. This is a Python Program to read a number n and print the number of digits in it	Date:	26-5-2020		Name:	JOBIN BENNY			
Subject BDA  Max. Marks Round 1=20 Round 2=14  Certification Course Summary  Course Hadoop  Certificate Provider Great learner academy Duration 28 min  Coding Challenges  Problem Statement:  1. This is a Python Program to Print all Integers that Aren't Divisible by Either 2 or 3 and Libetween 1 and 50  2. This is a Python Program to Check if a Number is a Palindrome  3. This is a Python Program to read a number n and print the number of digits in it  4. This is a Python Program to read a number n and print and compute the series "1+2++r  5. Given an array A of size N where the array elements contain values from 1 to N with duplicates, the task is to find total number of subarrays which start and end with the same element.  6. Write a program in C to print all permutations of a given string using pointers  Status: Solved  Uploaded the report in Github yes	Sem & Sec	8th Sem	A section	USN:	4AL16CS042			
Max. Marks   Round 1=20   Round 2=14    Certification Course Summary  Course   Hadoop   Duration   28 min    Coding Challenges  Problem Statement:  1. This is a Python Program to Print all Integers that Aren't Divisible by Either 2 or 3 and Libetween 1 and 50    2. This is a Python Program to Check if a Number is a Palindrome    3. This is a Python Program to read a number n and print the number of digits in it    4. This is a Python Program to read a number n and print the number of the series "1+2++n"    5. Given an array A of size N where the array elements contain values from 1 to N with duplicates, the task is to find total number of subarrays which start and end with the same element.  6. Write a program in C to print all permutations of a given string using pointers  Status: Solved  Uploaded the report in Github   yes			Online To	est Summary	<b>y</b>			
Course Hadoop  Certificate Provider Great learner academy  Coding Challenges  Problem Statement:  1. This is a Python Program to Print all Integers that Aren't Divisible by Either 2 or 3 and Libetween 1 and 50  2. This is a Python Program to Check if a Number is a Palindrome  3. This is a Python Program to read a number n and print the number of digits in it  4. This is a Python Program to read a number n and print and compute the series "1+2++r  5. Given an array A of size N where the array elements contain values from 1 to N with duplicates, the task is to find total number of subarrays which start and end with the same element.  6. Write a program in C to print all permutations of a given string using pointers  Status: Solved  Uploaded the report in Github yes	Subject	BDA	BDA
